PERGOLAS**

PERFECT COVER

As an elegant way to provide shade, protect against sudden thundery showers or simply create a new space outdoors, the terrace roof solutions from HELLA Terrace & Garden become real oases of well-being when we relocate our living space from indoors to outdoors during the summer months. They embody Mediterranean lightness, extend the living space and provide beautiful shade in sunny spots.

HELLA pergolas do not just provide efficient sun protection, they also protect against rain and, depending on the model chosen, against wind and prying eyes. Thanks to their robustness and weather resistance, the terrace

roof solutions are the perfect alternative to umbrellas and awnings. The VENTUR, SINTESI and ELEGANZA models offer optimal cover according to your needs and are available in almost all conceivable formats. In conjunction with HELLA's own ONYX control unit, the terrace roof solutions can be conveniently controlled via your smartphone and even react automatically to the weather.

SLAT ROOFS

VENTUR

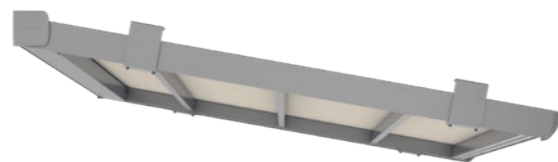

VENTUR is a slat roof with movable aluminium slats and a bio-climatic effect. It can incorporate a VENTUR SIDE vertical awning.

VENTUR FREE

VENTUR FREE is a slat roof without columns and can be integrated onto or into existing structures or mounted between two walls.

PERGOLAS

SINTESI FREE

This is the ideal solution for existing structures. Due to the small space required for the fabric's drive mechanism, it is easily added to an existing building.

SINTESI

This is an innovative pergola with a folding roof and optional vertical awning TERRA SIDE.

PERGOLA AWNING

As sturdy as a pergola, as slim and elegant as an awning. The ELEGANZA is easy to mount on walls, ceilings or rafters. In the protect version, the fabric is guided without gaps along the sides in a special profile for increased wind stability. A motorised Varioplus roller blind can also be installed between the rigid columns for vertical shading.

ELEGANZA

Anelegant pergola awning with a folding roof and optional Varioplus roller blind

FEATURES

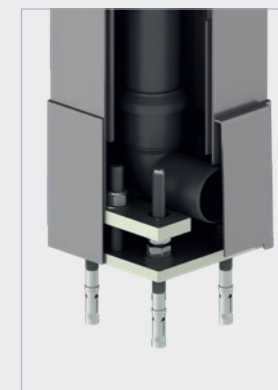

LED light fitting

The LED light fitting adds mood lighting where it is needed: in the space under the pergola.

Radiant heater

The infrared radiant heater turns covered patios into an oasis of well-being on cool evenings. Available with a ceiling mounting for VENTUR, and wall mounting for ELEGANZA and SINTESI.

Water drainage

In the VENTUR and SINTESI models, water drainage is concealed in the column.
