SUN PROTECTION**

Interior blinds

AMBIENCE AND COMFORT

Functional and decorative

Decorative interior blinds are the perfect supplement for external sun protection. Functional and easy to operate, they increase comfort in addition to improving architectural acoustics and glare protection. They regulate the amount of incoming light, offer flexible visual protection by means of different degrees of shading and create decorative accents in interior design.

Be it roller blinds, Venetian blinds, vertical blinds or pleated blinds – interior blinds by HELLA provide an abundance of creative opportunities and design versions. Thanks to the range of materials and a wide variety of color options, the interior textile blinds score points for both functionality and creativity.

HELLA offers almost infinite options to customise their interior textile blinds: a variety of special colors and fabrics enables the interior sun protection to be integrated elegantly into every house. This makes the sun protection products an attractive architectural highlight.

INSECT SCREEN

Always in shape

The pleated blind is a contemporary best seller. It is also the ultimate all-rounder: whether the window is triangular, trapezium-shaped or round – custom-made pleated blinds overcome every architectural challenge. Ideally suited as sun, glare and privacy protection, the pleated blind is a textile interior shade with permanent folds and, as a practical folding blind, gives every window that certain something. Pleated blinds ensure the optimal amount of incoming light and are especially easy to operate: they can be easily opened or closed from top to bottom and from bottom to top. Given the variety of colors, fabrics and rails, there are no limits to creative interior design.

Benefits:

- available for almost all window shapes
- washable variants available
- high durability as well as easy and flexible operation by means of a handle
- low flammability

VERTICAL BLINDS

Ideal lighting conditions

Vertical blinds are perfectly suitable for the stylish design of living rooms as well as office and business premises. Thanks to the flexible adjustment of the slats, they play with light and shade and create a feeling of boundlessness. Vertical blinds from HELLA do more than just pleasantly regulate the light coming into the room. The generous slats combine maximum sun protection with a flexible outside view and optimum illumination of the room.

Benefits:

- ideal shading for large glass surfaces, gable and ceiling systems, bay windows or arched windows
- high durability and easy operation by means of chain or motor
- low flammability

ROLLER BLINDS

The classic for every window

Flexible, practical and classy – the roller blind is the unmatched classic among the decorative sun protection products. Interior roller blinds by HELLA are functional design elements of modern interior architecture. There is a wide range of colors and fabrics to choose from, from black-out blinds to light, transparent roller blinds: with careful workmanship down to the last detail, the high-quality fabrics and the smart operation by means of chain, handles or motor, interior blinds meet the toughest requirements in terms of design and comfort. The fabric rolls up and unrolls perfectly and it can be operated manually or electrically. The roller blind is an all-round genius, which adapts itself optimally to any space situation. Interior roller blinds provide shade and help to regulate the indoor climate even beneath slanted roofs or in conservatories. The Eco range for interior blinds is particularly sustainable, as the fabric is made from recycled plastic from the sea.

Benefits:

- prevention of lateral oscillation
- rollers available with or without cassette
- compensating spring for comfortable operation
- low flammability, easy to care for, dirt-repellent

VENETIAN BLINDS

Practical for retrofitting

Interior Venetian blinds conveniently control the amount of incoming daylight and enable the effective utilisation of natural light sources in room lighting. The continuously adjustable slats protect from prying eyes and are available in different designs and colors. This makes interior Venetian blinds decorative and functional elements of interior design, which achieve individualised comfort and help in regulating the room temperature. Venetian blinds are also particularly easy to retrofit as internal sun protection.

Benefits:

- continuous light regulation
- very good visual and glare protection
- ideal for retrofitting
- different operating options
